

Indoor Siren

Capability Characteristics

Compact efficiency. Because of its suitable dimension and its easy mounting it can be connected to almost every alarm system including a 12V-supply.

SPECIFICATIONS

Nominal Voltage: DC12V

Working Voltage: 9-15V

Working Current: $\leq 300\text{mA}$

Working Temperature: $-20^{\circ}\text{C} \sim +60^{\circ}\text{C}$

Working Humidity: $\leq 95\%\text{RH}$

Sound Pressure $\geq 108 \pm 3\text{dB}/30\text{CM}$

Continuous working hours $\geq 45\text{min DC12V}$

Flashing times (minutes): 200 ± 30

Security Advices

Before using the device, please check it for any possible damages. In case of damage do not operate it. The device may not become subject of mechanical stress and should not be exposed to humidity or high temperature.

Clean the device with a dry and soft cloth only.

Caution! Should the device itself get damaged, please let the repair to the manufacturer or to a qualified service agent.

Please dispose packaging materials properly and do not let play children with it.

The device itself is no toy either. Do not let children play with it too.
