

DH-SD4D225DB-HNY

2MP 25x Smart Dual Light WizSense Network PTZ Camera

Wiz Sense

Launched by Dahua Technology, WizSense is a series of Al products and solutions that adopt independent Al chip and deep learning algorithm. It focuses on human and vehicle with high accuracy, enabling users to fast act on defined targets. Based on Dahua's advanced technologies, WizSense provides intelligent, simple and inclusive products and solutions.

Series Overview

With its powerful optical zoom and precise pan and tilt capabilities, the PTZ camera provides an all-in-one solution for long-distance outdoor video surveillance. The integration of smart dual light and Starlight technology makes this camera an excellent solution for monitoring in dark and low-light environments. Additionally, the series includes a day-and-night mechanical IR cut filter, ensuring high-quality images are produced across varying lighting conditions throughout the day.

Functions

Perimeter Protection

Automatically filters out false alarms caused by animals, rustling leaves, bright lights, and more, and uses secondary recognition during target detection to improve alarm accuracy.

- 1/2.8" 2Megapixel STARVISTM CMOS.
- · 25× optical zoom.
- · Starlight technology.
- · IR distance up to 100 m.
- · Warm light distance up to 100 m.
- · Max. 25/30 fps@1080p.
- · H.265 encoding.
- · Perimeter protection.
- · Face Detection, Up to 8 faces captured simultaneously.

Smart Dual Light

Dahua Smart Dual Light technology adopts smart algorithm to detect targets. Usually, the IR illuminator is on at night; when the target appears in the monitoring area, the white light is on, and the camera records the full-color video and information of key events. That is, the camera links snapshot and video with full-color image. When the target is out of the monitoring area, the white light is off and the IR illuminator is on, which reduces light pollution efficiently.

Auto Tracking

This feature controls the pan, tilt and zoom actions of the camera to automatically track an object in motion, to keep it in view of the camera. Tracking can be triggered manually or automatically by defined rules. Once a rule is triggered, the camera can zoom in and track the defined target automatically.

Protection (IP67, TVS 6000 V)

IP67, TVS 6000 V lightning proof, surge protection, and voltage transient protection.

SMD 3.0

Empowered by deep-learning algorithms, Dahua SMD filters out motion detection alarms triggered by targets that are not a concern. It quickly recognizes humans and vehicles, triggering alarms when an intrusion occurs.
