Launched by Dahua Technology, WizSense is a series of AI products and solutions that adopt independent AI chip and deep learning algorithm. It focuses on human and vehicle with high accuracy, enabling users to fast act on defined targets. Based on Dahua's advanced technologies, WizSense provides intelligent, simple and inclusive products and solutions.

Series Overview

The XVR4000-I/T Series provides cost-effective, high-performance recorders that are ideal for those with budget constraints seeking quality and functionality. It offers advanced AI functions and features two-way talk supported by all the channels. In addition, this XVR comes with a user-friendly analog system that has a low overall system cost, making it suitable for a wide range of applications.
Functions

Two-way talk
Allows for seamless communication between the camera, client and recorder over coaxial cable, and offers instant voice intercom and timely audio alerts.

SMD Plus
With intelligent algorithm, Dahua Smart Motion Detection technology can categorize the targets that trigger motion detection and filter the motion detection alarm triggered by non-concerned targets to realize effective and accurate alarm.

* *Dolynk cloud version: DMSS 2.0.30 and above, Dolynk Care 2.50.20 and above.*
· 4-channel two-way talk over coaxial cable allows for seamless communication between the camera, client and recorder.
· 4-channel SMD Plus for analog channels or 5-channel SMD by camera which allows the device to trigger accurate alarms for humans and vehicles.
· 4-channel AI Coding saves on storage and bandwidth while maintaining the details of targets in videos.
· Supports HDCVI, AHD, TVI, CVBS and IP video input.
· Supports up to 5-channel IP camera input and each channel can be up to 2 MP. The incoming bandwidth reaches 32 Mbps.
· Supports accessing Wi-Fi cameras, making it suitable for a wide range of scenes.

Smart Dual Light
With Smart Dual Light technology, you can select Smart Illumination Mode for the system to automatically switch between IR mode and white light mode. It allows white light to be turned on when a target is detected by the SMD Plus/Perimeter Protection function of AI-enabled XVR. This significantly reduces light pollution at night. Together with other modes, including IR Mode and White Light Mode, the smart dual light technology can meet the requirements of a wide variety of scenes.

One-click Arming/Disarming
With just one click, you can enable or disable alarm linkages to show messages, send emails, output audio alarms and more, through the mobile app and platform.

Customizable Alarm Audio
Designed for your convenience, the TiOC alarm can be customized to meet your needs. It is flexible, allowing you to directly upload your customized audio through the mobile app and XVR.

AI Coding-ABR
Compared with H.265, AI coding-ABR can save 50% on storage costs, and save bit rate for complex scenes, which can prioritize image quality in dynamic scenes.
