

# DHI-IVSS7124DR

256CH 4U Intelligent Video Surveillance Server

WizMind

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, IVSS, NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive AI solutions for verticals.

## Series Overview

Dahua IVSS goes beyond ordinary NVR products. It is an Intelligent Video Surveillance Server that combines video management features with traditional video storage functions in one device. Aside from the basic functions of a network video recorder, IVSS also has a variety of powerful AI features, such as face recognition, video metadata and industrial algorithms to meet the needs of different scenes.

## Functions

### Face Recognition (with AI Camera)

Real-time Face Detection & Recognition with AI cameras, with results for real-time face detection and recognition being displayed on the AI camera. Faces are recorded through the use of video metadata, and facial features are filtered during real-time display, focusing on only displaying faces with target features. Facial features include gender, age, expression, and more. The linkage actions for face detection and recognition events are customizable, including alarm, buzzer, snapshot, video recording, and more.

- 64-bit High-performance multi-core processor
- 256-channel IP video access
- Max 1280 Mbps/1280 Mbps incoming/recording bandwidth
- 24 bays, supports RAID 0/1/5/6/10/50/60
- 4 HDMI/1 VGA video output

### AI IVS (with AI Camera)

With deep learning algorithms, AI IVS technology can recognize humans and vehicles accurately. In restricted areas (such as pedestrian and vehicle areas), there is a great reduction in the generation of false alarms of intelligent detection based on target type (such as tripwire, intrusion, parking detection, loitering detection, crowd gathering estimation and more).

### Video Metadata (with AI Camera)

Video Metadata is attribute information extracted from a target for data retrieval. Currently, there are 4 main kinds of metadata in the security industry: Human face, human body, motor vehicle and non-motor vehicle metadata.

### ANPR

Automatic Number Plate Recognition is available for convenient entrance and exit management. This feature provides license plate recognition (working with Dahua ITC cameras), license plate comparison with blocklist and allowlist, vehicle database management, and vehicle records search.

### N+M Hot Standby

The highly reliable redundancy N+M Hot Standby design provides a secure, failover technique, ensuring immediate backup. In the event of a system failure, the sub server instantly takes over the main server to ensure no data is lost.

### Smart Tracking

The automatic tracking PTZ feature automatically tracks moving targets in the field of view of the camera. This function is ideal for following objects as they move through airports, parking lots, city centers, and other scenes.

## Technical Specification

### System

|                     |                             |
|---------------------|-----------------------------|
| Main Processor      | 64-bit multi-core processor |
| Operating System    | Embedded Linux OS           |
| Operating Interface | Web (PCAPP), local GUI      |

### AI Applications

|              |                                                                                                                                                                                                                                                                            |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AI by Camera | Face detection; face recognition; video metadata (human; vehicle; non-motor vehicle); IVS; license plate comparison; tripwire people counting; regional people counting; abnormal number of people in queue; smoking detection; call detection; face & body detection; SMD |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Face Detection

|                |                                                                                                                                                                                             |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Face Detection | 1. AI by Camera: Supports 160-channel 2 MP or 80-channel 4 MP resolution with face detection IP camera;<br>2. Supports 6 properties: Gender, age, glasses, expression, face mask, and beard |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Face Recognition

|                        |                                                                                                                                                                                                                                        |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Face Database Capacity | 1. 50 human face databases with 500,000 face pictures in total<br>2. 5 passerby databases with 500,000 face pictures in total<br>The human face database and the passerby database share the total capacity and number of face images. |
| Face Recognition       | 1. AI by Camera: 160-channel 2 MP or 80-channel 4 MP face recognition with face recognition IPC;<br>2. Supports entries frequency alarm                                                                                                |

### Vehicle License Plate Comparison

|                                  |                                                                                                  |
|----------------------------------|--------------------------------------------------------------------------------------------------|
| License Plate Database Capacity  | 1. 50 plate databases with 500,000 plate numbers in total<br>2. Supports allowlist and blocklist |
| Vehicle License Plate Comparison | Supports 160-channel 2 MP or 80-channel 4 MP resolution with ITC                                 |

### Video Metadata

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Video Metadata | 1. AI by Camera: Supports 160-channel 2 MP or 80-channel 4 MP resolution<br>2. Object type:<br>Human body: Gender, age, sleeves length, top color, bottom type, bottom color, bag, rain coat, umbrella, hat, hairstyle, direction, hold a baby, face mask<br>Vehicle: Vehicle type, vehicle color, plate color, logo, calling, seatbelt, ornament<br>Non-motorized Vehicle: Non-motor vehicle type, non-motor vehicle color, number of passengers, umbrella, rain coat, bag, sleeve, length, top color, hat, hair style, face mask |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### IVS Analytics

|     |                                                                                                                                                                                                                                 |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| IVS | 1. AI by camera: Supports 160-channel 2 MP or 80-channel 4 MP resolution<br>2. Rules: AI by Camera: tripwire, intrusion, abandoned object, missing object, fast moving, crowd gathering, loitering, parking, and fence-crossing |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Video Diagnosis

|                 |                                                                                                                                                                                                     |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Video Diagnosis | 1. Supports 1-channel tour detection<br>2. Supports 13 detection items: blurry video, low contrast, video tampering, video jitter, abrupt image change, image freeze, overexposure detection, video |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                 |                                                                                         |
|-----------------|-----------------------------------------------------------------------------------------|
| Video Diagnosis | loss, noise detection, scene changing, static noise, interference fringe and color cast |
|-----------------|-----------------------------------------------------------------------------------------|

### Audio and Video

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Access Channel            | 256-channel                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Network Bandwidth         | Incoming bandwidth: 1280 Mbps;<br>Recording bandwidth: 1280 Mbps;<br>Outgoing bandwidth: 1280 Mbps                                                                                                                                                                                                                                                                                                                           |
