

DH-MPT221-S

Dahua Body Camera

Series Overview

With its ergonomic design, the Body Camera is both easy to carry and convenient to use. By just the press of a button, it can take pictures, and record videos and audios while an event is occurring, and directly upload recording files to the Data Collection Station or platform. Through the 4G network, it can also cooperate with the platform to perform functions such as live video, group talk and alarm event handling.

Functions

Capture the Truth in Any Situation

With a simple press of a button, the device effortlessly records videos and audios, and captures images to preserve crucial information of any given event.

Interaction with the Control Center

The platform of the control center can obtain live videos of the site and real-time GPS locations of personnel through the 4G network.

Emergency Handling

In the event of an emergency, pressing the SOS button will promptly send alarms to the platform. The emergency can also be conveniently reported on directly from the scene using the audio talk function. After the emergency is received, the platform will swiftly dispatch necessary personnel to the GPS location displayed on the map, prioritizing the safety of individuals on-site.

Intelligent Applications

By supporting face detection and license plate recognition, the device can swiftly locate blocklisted individuals or vehicles by working in synergy with the platform. This seamless cooperation significantly enhances efficiency and effectiveness.
