

DH-XVR5208A-I3/T

8CH Penta-brid 5MP Value/1080P 1U 2HDDs WizSense Digital Video Recorder

Launched by Dahua Technology, WizSense is a series of Al products and solutions that adopt independent Al chip and deep learning algorithm. It focuses on human and vehicle with high accuracy, enabling users to fast act on defined targets. Based on Dahua's advanced technologies, WizSense provides intelligent, simple and inclusive products and solutions.

Series Overview

The XVR5000-I3/T Series offers powerful recorders that work in conjunction with 1080p HDCVI cameras, delivering smooth and crisp live videos along with an array of advanced security functions. It features two-way talk over coaxial cable, and incorporates AcuPick technology, along with other AI functions, to enhance intelligence and convenience in the surveillance field.

Functions

Two-way talk

Allows for seamless communication between the camera, client and recorder over coaxial cable, and offers instant voice intercom and timely audio alerts.

Enhanced Encoding

Encoding Enhancement mode optimizes videos through real-time encoding to make them smoother and improve scene rendering.

Face Recognition

Dahua Face Recognition technology extracts the features of captured faces and compares them with that in face database. *Face Recognition takes effect when Face is selected in AI Mode.

- * Dolynk cloud version: DMSS 2.0.30 and above, Dolynk Care 2.50.20 and above.
- 8-channel two-way talk over coaxial cable allows for seamless communication between the camera, client and recorder.
- 2-channel AcuPick for analog channels which improves the efficiency of target retrieval.
- 4-channel perimeter protection for analog channels which supports tripwire and intrusion detection powered by AI.
- 2-channel face recognition for analog channels which supports face comparison.
- 8-channel SMD Plus for analog channels or 12-channel SMD by camera which allows the device to trigger accurate alarms for humans and vehicles.
- 8-channel Al Coding saves on storage and bandwidth while maintaining the details of targets in videos.
- · Supports HDCVI, AHD, TVI, CVBS and IP video input.
- Supports up to 12-channel IP camera input and each channel can be up to 6 MP. The incoming bandwidth reaches 64 Mbps.
- Supports accessing Wi-Fi cameras, making it suitable for a wide range of scenes.
- · Smart H.265+ and H.265 dual-stream video compression.

Perimeter Protection

Automatically filters out false alarms caused by animals, rustling leaves, bright lights, etc. Enables system to act secondary recognition for the targets. Improves alarm accuracy. *Perimeter Protection takes effect when IVS is selected in Al Mode.

AcuPick

This industry-leading search technology effectively utilizes back-end intelligence to help with searching through massive video data to quickly and conveniently locate targets with greater precision. *AcuPick takes effect when AcuPick is selected in Al Mode.

SMD Plus

With intelligent algorithm, Dahua Smart Motion Detection technology can categorize the targets that trigger motion detection and filter the motion detection alarm triggered by non-concerned targets to realize effective and accurate alarm. *SMD Plus takes effect when SMD is selected in AI Mode.
